Fax 415-863-4358  
[www.pacrepro.com](http://www.pacrepro.com)

\* We will ship samples only with Physician consent

We strongly recommend that all samples be shipped in liquid nitrogen tanks (not ice) to insure sperm survival. There is a \$60.00 handling charge by The Fertility Center of Oregon Andrology Lab for transfer of specimens to our sperm storage tank. There is an additional monthly charge for storage of sperm samples whether or not you are actively undergoing treatment. Normal storage fees for frozen sperm samples would also apply to long term or other storage requirements.

**PLEASE NOTE:** We cannot assume any responsibility for sperm counts, motility, pregnancy rates, donor characteristics, or financial or other problems with sperm samples which are ordered from an outside facility.
